

Georgia's Ranking Among the States:

Budget, Taxes, and Other Indicators

IN COLLABORATION WITH

ABOUT THE CENTER FOR STATE AND LOCAL FINANCE

The Center for State and Local Finance (CSLF) mission is to develop the people and ideas for next generation public finance. Key initiatives include: I) Developing executive education programs in public finance to provide professional development for the next generation of practitioners in state and local finance; 2) Building technical assistance capacity in next generation technologies for the public sector that include the use of "big data" and improved analytics to better inform policymakers and to better target solutions to public sector problems; 3) Supporting scholarship on critical challenges in state and local fiscal and economic policy; and 4) Building a strong capacity to translate and communicate academic research for the practitioner audience.

CSLF Reports, Policy Briefs, and other publications maintain a position of neutrality on public policy issues in order to safeguard the academic freedom of the authors. Thus, interpretations or conclusion in CSLF publications should be understood to be solely those of the author(s).

For more information on the Center for State and Local Finance, visit our website at: cslf.gsu.edu.

ABOUT THE FISCAL RESEARCH CENTER

Established in 1995, the Fiscal Research Center (FRC) provides nonpartisan research, technical assistance and education in the evaluation and design of state tax and economic policy. FRC's responsibilities include developing estimates for tax-related fiscal notes, writing the Georgia State Tax Expenditure Budget, supporting the state's economist, and conducting policy and academic research on a variety of topics associated with state tax policy issues.

FRC Reports, Policy Briefs, and other publications maintain a position of neutrality on public policy issues in order to safeguard the academic freedom of the authors. Thus, interpretations or conclusions in FRC publications should be understood to be solely those of the author(s).

For more information on the Fiscal Research Center, visit our website at: frc.gsu.edu.

ACKNOWLEDGEMENTS

This guide mirrors the format and content of the annual report, "Virginia Compared to the Other States," produced by the Virginia's Joint Legislative Audit and Review Commission. I would especially like to thank Joe McMahon, Senior Legislative Analyst, and Kathy DuVall, Publications Analyst, for their assistance during this project. Additionally, appreciation goes to Dr. Robert Buschman and Mels de Zeeuw for their careful review of the data.

Introduction

Enclosed is a collection of quantitative metrics and state rankings that compare Georgia to states across the nation. While several of the comparisons focus on total state or local government revenue and expenditures, the report also includes a number of measures that provide comparisons of either expenditures or state characteristics within specific functional areas, such as education, health, and transportation. The state rankings for each topic are generally (with a few exceptions) determined by the reported total dollar value or percentage, with the highest state value or percentage ranked number one. This 2015 guide is the first issue of an intended annual publication from the Center for State and Local Finance. We hope it will serve as a convenient reference guide for policymakers, the media, and the public.

Sources

The 38 metrics contained within the report are based upon data from a variety of sources. Each metric within the report contain a listing of the sources used to produce the reported information. Although each source is updated periodically in accordance with its own unique schedule, we have made an attempt to use the latest information available for each measure. A partial list of the data sources includes:

- ▶ U.S. Census Bureau, Annual Population Estimates
- ▶ U.S. Census Bureau, Annual Surveys of State and Local Government Finances
- ▶ U.S. Census Bureau, Poverty: American Community Survey Briefs
- ▶ Bureau of Economic Analysis
- ▶ College Board, Trends in College Pricing
- ▶ National Association of State Budget Officers, State Expenditure Report
- ▶ State Higher Education Executive Officers
- ▶ Bureau of Labor Statistics
- ► Centers for Disease Control and Prevention

Quick Stats

- ➤ Georgia's per capita personal income increased by 3.3 percent from 2013 to 2014, 18th highest growth rate among all states.
- ▶ Per capita personal income increased in all 50 states by an average rate of 3 percent from 2013 to 2014 (50-state average).

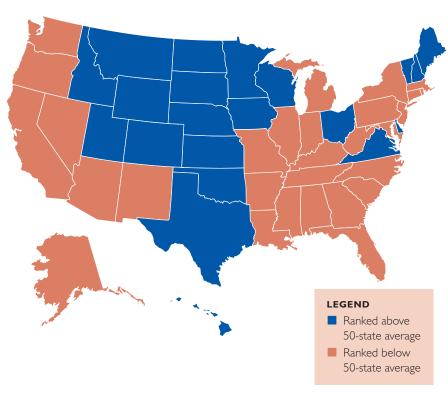

Note: Personal income is the income from net earnings (wages, salaries, and other labor income); property (personal dividend, interest, and rental income); and transfer payments such as Social Security and unemployment benefits. Personal income is measured before the deduction of personal income taxes and other personal taxes.

50	Idaho	7,264

Quick Stats

- ▶ Georgia's per capita state and local revenue decreased by \$1,301 (15.1 percent) from FY 2011 to FY 2012. Per capita tax revenue increased by 1.8 percent but was offset by decreases in federal transfers (7.2 percent) and insurance trust revenue (72.9 percent).
- ▶ The U.S. 50-state average per capita state and local government revenues decreased by 10.6 percent from FY 2011 to FY 2012.

Notes:

- 1. Per capita state and local revenue numbers in comparisons 8 and 9 do not sum to the combined per capita state and local revenues in this comparison, because the Census Bureau eliminates intergovernmental transactions from combined state and local amounts.
- 2. Insurance trust revenue includes (a) retirement and social insurance contributions, including unemployment compensation "taxes" received from employees and other government or private employers, and (b) net earnings on investments set aside to provide income for insurance trusts.

Quick Stats

- ► Georgia's per capita general fund expenditures increased by \$65 (3.7 percent) from FY 2012 to FY 2013.
- ► Georgia's total general fund expenditures were \$18 billion in FY 2013, an increase of \$779 million from FY 2012.

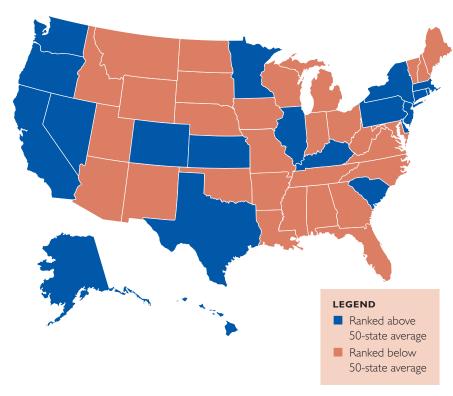

Note: The general fund, the predominant fund for financing a state's operations, receives revenues from broad-based state taxes. Specific functions are financed differently from state to state.

Quick Stats

► Georgia is one of seven states that have maintained an AAA rating from S&P since 2001.

Note: States are ranked based on the average value of their bond ratings on a 10-point scale, with AAA rating equal to 10 points.

Sources: JLARC, "Virginia Compared to the Other States," 2015 Edition (ratings as of December 2014) and The PEW Charitable Trusts, State Credit Ratings from Standard & Poor's, 2001-2014, http://www.pewtrusts.org/en/research-and-analysis/blogs/stateline/2014/06/09/sp-ratings-2014

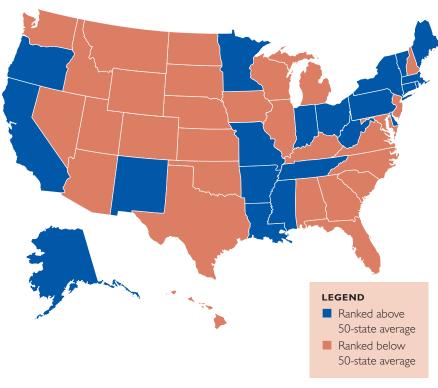

^{*}States with no outstanding general obligation debt. Shown are the ratings these states would likely receive if they decided to issue general obligation debt.

Quick Stats

- ▶ The percentage of persons under 65 covered by health insurance in Georgia increased from 78.3 percent to 81.6 percent from 2012 to 2013.
- ▶ In 2013, 61.7 percent of Georgians under 65 years of age had private insurance, and 20.1 percent had public health insurance (Medicare, Medicaid, VA Health Care, CHIP, state health plans).

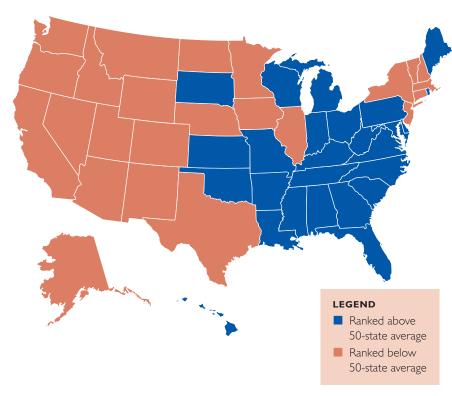

Note: Percentages for private/public health insurance do not add to total coverage because some individuals report having health insurance coverage from both private and public sources.

Quick Stats

- ► Georgia's higher education appropriations per FTE student increased by 6.7 percent from FY 2013 to FY 2014 (constant adjusted to 2014 dollars).
- ► Georgia's higher education appropriations per FTE student in FY 2014 was 23.2 percent lower in FY 2014 than in FY 2008 (constant adjusted 2014 dollars).

Notes:

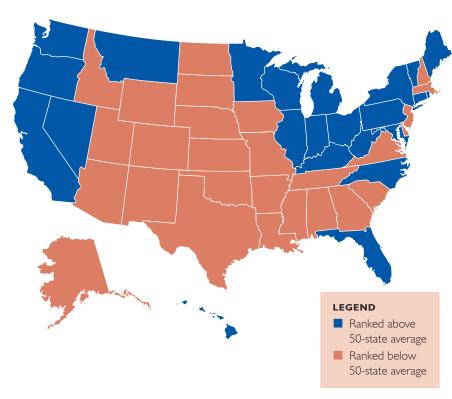

- I. Educational appropriations are a measure of state and local support available for public higher education operating expenses including ARRA funds; they exclude appropriations for independent institutions, financial aid for students attending independent institutions, research, hospitals and medical education.
- 2. Adjustment factors, to arrive at constant dollar figures, include Cost of Living Adjustment (COLA), Enrollment Mix Index (EMI), and Higher Education Cost Adjustment (HECA). The COLA is not a measure of inflation over time.

Quick Stats

▶ In 2013, Georgia had 128,795 state government FTEs. This represents a 0.7 percent decrease from 2008.

Notes:

- I. Full-time equivalent (FTE) is a computed statistic representing the number of full-time employees that could have been employed if the reported number of hours worked by part-time employees had been worked by full-time employees. This statistic is calculated by dividing the "part-time hours paid" by the standard number of hours for full-time employees and then adding the resulting quotient to the number of full-time employees.
- FTE per 100 persons is calculated as state government FTE divided by state population, divided by 100.
